

KOHL'S

Technical Design Intern

Sounds good on you.

As a Technical Design Intern, you will work with cross-functional teams to bring design sketches to life in a way that ensures quality and utility. Basically, you make sure someone can actually wear and use the products that your design partners create.

What you'll do

Work as an intern in Home, Footwear, or Apparel

Inspect product samples for defects and ensure specifications are met accurately

Make recommendations on what changes need to be made to products to make them wearable

Use competitive shopping to analyze trends, fit, and construction techniques

Attend fittings and communicate fit suggestions and comments to vendors

Career Path

Technical Design Intern
Assistant Technical Designer
Associate Technical Designer
Technical Designer
Technical Design Manager
Technical Design Senior Manager

This is you

Undergraduate Junior

You're a little Type A. Okay, you're a lot Type A - details are everything!

You live by deadlines - you rarely, if ever, miss them!

You're a creative problem-solver and have an eye for fit (buttons need to fit through holes!)

You're familiar with textiles, construction, and pattern-making/grading

You might already be proficient in WebPDM or a similar sketching program

Your major is probably something like

Apparel Design
Fashion Design

Perks!

10 week paid internship

Associate discount

Free summer housing

Work with the coolest people around
